Subject: Dimock TAL List for metals

Stevie,

As you pointed out, we omitted the Li from our list of analytes for metals in Tables 1 and 2 of the sampling plan. I guess the e-mail we received regarding expedited TATs was the only reference/guidance for adding Li. We will add that to our Sampling Plan Tables. All the other non-CLP TAL metals that we had in the SAP Tables (B, Ti, Sr, and U) are all on your RL list. I am currently reviewing the RL lists.

Thanks.
